Engineered for Excellence

Drive with ease & speed with Bremick's **NEW SureQuik® Pro** Timber Screw range.

These multi-purpose timber screws are perfect for a range of timber to timber fastening applications and are offered in Zinc Yellow, B8 and Stainless Steel 304 for internal and external environments.

Featuring a precision fit drive recess the SureQuik Pro screws firmly engage with the driver bit allowing the user to fasten with one hand for greater control.

The diamond ribbed head has been engineered to countersink into the toughest of materials to provide a clean and flush finish while the clearing thread reduces tension on the screw head when embedding.

The aggressive serrated thread and reverse spiral point pierce the timber surface quickly and with ease, eliminating the need for pre-drilling and reduces the likelihood of the screw snapping or timber splitting.

Sharp point for instant pick up

Deep drive recess for one handed operation

Diamond ribbed head for clean embedment

Thicker shank for reduced risk of snapping

Serrated Threads cut timber fibres

Reverse Spiral Point for clearing timber fibres

Precision at every turn

Enviro Pack®
Environmentally Sustainable Packaging

A finish for every job!

Suitable for multiple timber materials

Melamine

Timber Framing

Plywood

MDF
